ABOUT

Back-End Engineer with experience designing & building scalable, distributed systems & backend infrastructure using **FastAPI, Django, PostgreSQL, Redis & Docker**. Experienced in search systems (Elasticsearch), observability, **Linux** administration & production deployments. Passionate about building high-performance, reliable & secure software, with hands-on experience across architecture, infrastructure & backend development.

EXPERIENCES

Goftomeet.com - Qom, Iran | *Founding Back-end Engineer*

June 2026 - PRESENT | Founding Team

- Architected & built the backend of a real-time communication platform using **FastAPI & LiveKit**.
- Implemented AI agent integration, payment workflows & OTP authentication.
- Designed & managed containerized production infrastructure, Nginx & Linux servers.
- Architected & built scalable real-time backend services from the ground up.

Also: MinIO, DramatiQ

CRCIS - Qom, Iran | *Back-end Engineer (Search Platform)*

Oct 2024 - PRESENT | Full-time (Conscript)

- Designed, developed and optimized multi-cluster Elasticsearch solutions handling several terabytes of data for high-traffic search platforms, improving query performance and reducing storage usage.
-  Architected and implemented an observability platform using EFK, Elasticsearch Data Streams and Kibana, including a reusable Python integration package, enabling end-to-end data visibility & traceability across distributed systems.
- Built ETL pipelines with Logstash for large-scale data ingestion and transformation.
- Designed an event-driven synchronization system using Inbox/Outbox patterns to ensure idempotency and reliable data consistency.
- Participated in Domain-Driven Design (DDD) workshops and domain modeling.

Also: FluentD, RabbitMQ, Gitlab CI

Paknevis - Tehran, Iran (Remote) | *Senior Back-end Engineer*

Jun 2025 - PRESENT | Contract

-  Reduced processing time for large workloads by 93% through parallel processing, stack upgrades and caching optimizations. (Django)
- Designed the migration roadmap from Docker to Kubernetes

SKILLS

Languages: Python, Go (Golang), JavaScript/TypeScript

Frameworks & Libraries: FastAPI, Django (REST Framework, Ninja), PyTest, Express, NestJS, GraphQL

Databases: PostgreSQL, ELK (Elasticsearch), Redis

DevOps & Infrastructure: Docker, CI/CD, Nginx, Linux (LPIC 1, 2), Kubernetes

Front-end: Vue, Nuxt, CSS, Tailwind, PrimeUI

Architecture & Tech: Blockchain, FinTech, Information Retrieval (Search & Analytics) Clean Architecture, Distributed Systems, Microservices, Event-Driven Architecture

LANGUAGES

English (Professional)

Persian (Native)

Arabic - MSA (Intermediate)

Turkish (Limited)

Signal Group - Qom, Iran | *Software Engineer (AI Platform)*

May 2026 - PRESENT | Part-time

- Built an AI-driven software development platform using agent orchestration, integrating Jira, code repositories, databases and internal infrastructure.
- Designed and deployed the platform infrastructure, security and access controls, including a Telegram AI assistant.
- Reduced Docker Registry **storage usage by 89%** through automated cleanup policies.

Also: OpenClaw, Agent Orchestration, Kubernetes

PERSONAL PROJECTS

FastIoC — *Python Package*

IoC/DI container for FastAPI with automatic type-based dependency injection & controllers. [Link](#)

Obsidian Dynamic RTL — *Obsidian Plugin*

A popular plugin with over 7,000 downloads that addressed right-to-left (RTL) language support in Obsidian, solving a key issue at the time of its release. [Link](#)

FREELANCE PROJECTS

Image Generation Platform | Ankara, Türkiye

Jun 2025 - Jul 2025 | Remote

Built a full-stack image generation platform with template-based text and color customization, bulk upload, admin dashboard, authentication, asynchronous multi-process queue, and Docker deployment. (Python, Flask (Quart), Vue.js)

Google Search Result Discovery Tool | Ankara, Türkiye

Jun 2025 - Jul 2025 | Remote

Built a full-stack Google Search related-query discovery tool using SERP API, featuring an admin dashboard, bulk addition, and Docker deployment. (Python, Flask)

Food Reservation System | Qazvin, Iran

May 2021 - Jul 2023 | Hybrid

Developed & supported a school meal reservation system with online wallet top-up, reservation and cancellation features (with automatic refunds), and transaction tracking. Built an advanced admin dashboard for managing users, credits, meals, deadlines, and viewing comprehensive data tables. (PHP, Mariadb, JavaScript, Bootstrap) [Link](#)
